

Flexy Dual Shore – 1.5 Bellows

Vacuum Cup Properties

Material	Color	Temp. Range	Shore Hardness
Polyurethane	Dark Blue / Blue	5°– 50°C	30° / 60° Shore

1.5 Bellow Standard Cups

- Our 1.5 family you will find in the sizes from Ø 8 mm to Ø 100 mm .
- Our CombiFlex cups you will find in standard hardness 30/60 shore A and 60 shore A. The two hardness cup 30/60 shore has a bellow in 60 shore and a lip in 30 shore, which makes the cup stable and durable with excellent sealing properties.
- Our "CombiFlex " material is developed to meet all the characteristics that is required for a high performance vacuum cup. Normally our polyurethane vacuum cups will last 3-4 times longer than the cups made of rubber or other vulcanized or polymerized materials. This means less "down time" but more "turn over" with increased productivity. Their key characteristics are good resilience or flexibility, high tensile strength with high wear and tear resistance. Comparing to other famous brand names, our product quality is comparable or even better. In general we are also able to keep a much more competitive price.
- The 1.5 family is good in areas with slightly convex surfaces, compensates up to a certain degree for height differences and separation of thin materials.

Flexy Standard Cups 1.5 Bellows Family
