

Foam Vacuum Gripper

Foam

JOULIN

benefits

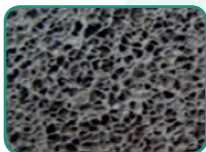

Easy to remove...

- Easy to remove and reposition
- Different thicknesses
- Moisture resistant
- Better foam adhesive performance
- Consistent quality
- Custom dimensions available
- Large stock of proprietary foam materials
- Punch or water jet
- Large range of foam materials to fit your specific application

...and replace

easy to fit

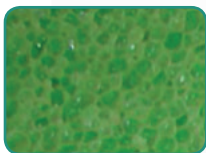

Universal Foam:

- Most commonly used pad material.
 - Offers softness, resistance and low memory.
 - Economical.
 - Many thicknesses available.
- For wood, cartons, buckets, tins, barrels, molded parts, perforated parts, etc...*

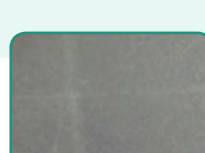

Porous Foam:

- For heavy duty material handling situations with uneven surfaces.
 - The vacuum is dispersed evenly throughout the foam, allowing strong lifting capacities and maximum surface adhesion.
- For heavy cartons, contoured parts, abrasive materials, etc...*

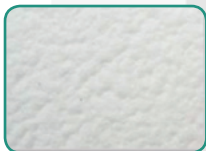

Rough Foam:

- High density durable foam.
 - Resists abrasions and cutting from rough materials.
 - Reduces long term operating costs.
- For bricks, cinder blocks, frozen products, abrasive materials, etc...*

High Density Foam:

- Mostly used for open top applications.
 - Unaffected by the protruding sharp edges of the product.
 - Long life between change-outs.
 - The overall product surface must be quite flat.
- For Can layers, tins, open top products, etc...*

FDA Compliant Foam:

- For applications in direct contact with food.
- For all types of food products.*
